

In the Specification:

Please substitute the following paragraphs for the corresponding paragraphs beginning at the indicated location in the specification as originally filed.

(Page 2, line15+)

It is therefore an object of the present invention to provide an EMI-suppressing cable having the magnetic material layer formed on the outer surface of the shielding layer, which ~~enable to enhance~~ enables the enhancement of the EMI-suppressing effect and also ~~to reduce the~~ enables the reduction of cost.

(Page 2, line 33+)

In the above configuration, as compared with the related construction in which the ferrite core is externally provided on a localized portion of the outer surface of the cable, the externally-mounting operation is not necessary, which contributes to the reduction of the cost. And besides, there are no ~~restriction restrictions~~ with respect to the increased mounting space, the increased weight, etc., and therefore this cable is highly useful.

(Page 4, line 6)

Fig. 2 ~~is~~ an enlarged view of a portion A of Fig. 1;
